- ▶ UPGRADE OPTIONS AVAILABLE

The GTF Field Master is a new breed of rental marker. Designed with simplicity in mind, field operators will enjoy its durability and ease of use. The GTF has all the features of higher end markers yet can be completely field stripped with no tools required. The Quick Strip Back Block allows you to field strip the GTF Field Master in literally one second. Simply rotate the back block counter clock wise one half turn and you can remove all the internals for cleaning.

The quick strip back block can not be removed when the marker is cocked. There are no screws to strip out, no push pins to wallow out, and no annoying pin retainers to lose. Maintenance time and costs are cut in half, making your bottom-line even more profitable.

GTF Field Masters have been tested in real rental fleet's & proved themselves time and again as a durable and cost effective rental marker, capable of grueling rental conditions.

Contact Pro Star Sports for more information on the GTF Series and what it can do for your business today.
